

## American Mathematical Association of Two-Year Colleges

### **AMATYC PUBLICATIONS**

#### **Goal: ENGAGING THE PUBLIC**

##### **Summary:**

AMATYC is a professional organization for two-year college mathematics educators. These educators form our chief public. Through these members, we also reach their mathematics departments. Since many community colleges work with their local school systems, and since two year college teachers' students come from these systems, AMATYC feels it is important that two-year college educators be kept up to date on what is happening with the *No Child Left Behind* program.

##### **Purpose:**

Inform AMATYC's public through an annual conference, 43 state affiliates, a journal, a newsletter, and a web site.

##### **Accomplishments/Results:**

AMATYC members are kept informed about trends in education and new developments in their field far more than their colleagues. AMATYC maintains an up to date web site [www.amatyc.org](http://www.amatyc.org), issues its journal twice a year, and its newsletter 5 times per year. It also does special mailings and E-mailings as appropriate.

##### **Plans for the next 12 months:**

Maintain the level of AMATYC publication activity
